SIT313 - Full-Stack Development: Secure Frontend Applications

Newsletter

Overview

This task intends to provide you with experience in [connecting ReactJS to NodeJS](#). You are given the wireframe of the home page of DEV@Deakin Web Application.

You will find "Topic Videos and Demo Videos" of Week 10 on the unit site to be particularly useful as a reference for this task. Please also keep an eye on your email and any announcements that may be made on Cloud Deakin.

Task Requirements

In this task, you need to connect the DEV@Deakin app to the newsletter and welcome email feature that you developed in Task 2.1P as shown below. When a user subscribes their email to the newsletter component in the home page, a welcome email will be sent through the server. Therefore, you need to add the following component to the home page.

A wireframe of a newsletter sign-up and footer section. At the top, there is a grey bar with the text "SIGN UP FOR OUR DAILY INSIDER" on the left, a white input field with the placeholder text "Enter your email" in the center, and a grey "Subscribe" button on the right. Below this is a teal-colored footer area. It is divided into three columns: "Explore" with links to Home, Questions, Articles, and Tutorials; "Support" with links to FAQs, Help, and Contact Us; and "Stay connected" with Facebook, Twitter, and Instagram icons. At the bottom center of the footer is the "DEV@Deakin" logo, and at the very bottom are links for "Privacy Policy", "Terms", and "Code of Conduct".

Submission Instructions

To submit this task on OnTrack, please follow the guidelines below:

- Ensure that all project files related to this task are stored in a GitHub repository named "Task 10.1P".
- Submit a link to a demo video showcasing the loading and running of your task page.
- Consolidate all required links, including a screenshot of your webpage, into a single PDF file.
- Submit the PDF file through the task submission page on OnTrack.

- Grant access to your marking tutor to the GitHub repository, so that we can review your work.
- Ensure that your demo video and the GitHub repository are not public. If you choose to upload the video to platforms like YouTube or Deakin Air, make sure it is set to private and only accessible to your teaching team.
